

PRESS RELEASE

Expansion of US-based support of scanning applications

SCANLAB appoints Amanda Dobbins as Director of New Business Development for the American and global markets

St. Charles IL, USA / Puchheim, Germany, October 22, 2015 – As the technology-leading OEM manufacturer of laser scanning systems, SCANLAB AG remains on an international growth path. The company, headquartered in Puchheim near Munich, announces the appointment of Amanda Dobbins as Director of New Business Development for SCANLAB America, focused on developing laser scanning solutions for applications worldwide.

For 25 years SCANLAB has been meeting the needs of its customers worldwide with reliable and industry-proven technology based on German engineering. Since 2003 the company has operated in the US with a local subsidiary. To increase customer support and to better understand the needs of scanning applications, SCANLAB is enlarging the US team.

Amanda Dobbins has 20 years professional experience in working with OEM companies developing systems which utilize lasers, precision optics, and beam steering devices. She was formerly the Director of Sales & Marketing of an optical components manufacturer where she was responsible for new product introductions and collaborations in medical devices and analytical instrumentation. Previously she spent more than a decade involved in applications including laser materials processing, biophotonics, and ophthalmology.

Amanda Dobbins earned her B.Sc. in Physics from the University of Leicester, UK, in 1995.

Current SCANLAB Event Calendar:

FABTECH 2015, November 9-12, 2015 in Chicago, Illinois, USA North Hall 2, booth N19097. Exhibitor is Blackbird Robotics, a SCANLAB subsidiary.

AIMEN – XI Workshop on Materials Processing with Laser Technology, November 12-13, 2015 in O Porriño (Vigo), Spain.

SPIE Photonics West, February 16-18, 2016 in San Francisco, California, USA – South Hall, booth 2317.

About SCANLAB:

With over 20,000 systems produced annually, SCANLAB AG is the world-leading and independent OEM manufacturer of scan solutions for deflecting and positioning laser beams in three dimensions. Its exceptionally fast and precise high-performance galvanometer scanners, scan heads and scan systems find application in industrial materials processing and the electronics, food and beverage industries, as well as biotech and medical technology. For 25 years, SCANLAB has secured its international technology leadership through pioneering developments in electronics, mechanics, optics and software, as well as the highest quality standards.
